Therapeutic Community – Knox Recovery

**Project  
Hope**  
Hearing Other Peoples Experiences

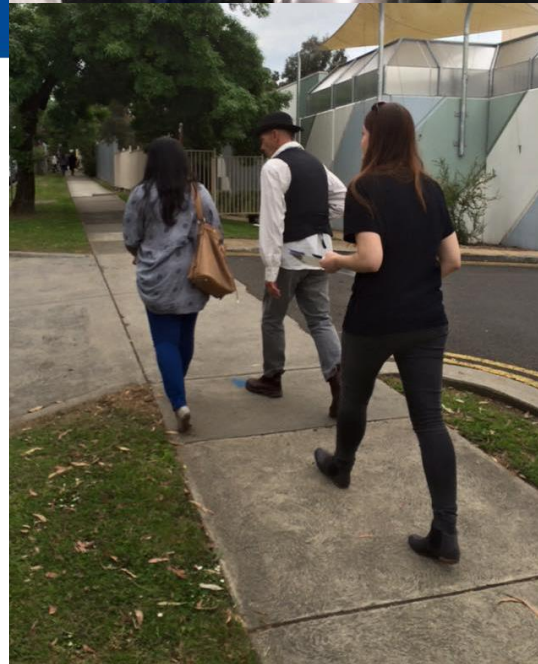

The Hope Bus Tour is a unique and informative professional development opportunity and orientation for staff working in AOD and MH services in the Eastern Region.

The bus will depart from Knox Social and Community Health and take participants to selected AOD/MH services in the Outer East.

The tour has been created in partnership with people who have a lived experience of being clients of the services visited. They will provide information on the services from their perspective.

As a health professional, this will increase your ability to work in partnership with your clients and the local services to create a more positive and integrative pathway to recovery.

We believe **everyone** can  
**recover, discover & transform**  
Knox Social and Community Health - a service of EACH
